

CE-marked house is an assurance by Finndomo, Sonkajärvi plant, that the product conforms to Directive's essential requirements of the building and its fitness for use complies with the product's European Technical Approval. It also means that all the criteria for quality assurance and Conformity assessment have been fulfilled.

The manufacturer declares that the building (works) will fulfil any regulated essential requirements defined in Construction Product Directive, which are

- Mechanical resistance & stability
- Safety in use
- Safety in case of fire
- Protection against noise
- Hygiene, health and environment
- Energy, economy & heat retention.
